SUBRAMANYA V DATA ENGINEER ENTRY-LEVEL

LinkedIn | GitHub | Leetcode | Neetcode | HankerRank + 91 70196 08472 subramanyav2002@gmail.com Bengaluru, Karnataka, India

PROFILE SUMMARY

Aspiring Data Engineer with hands-on experience building batch and real-time data pipelines using Apache Spark, Kafka, Airflow, DBT, and Delta Lake. Contributed to Apache Beam through Google Summer of Code, delivering merged contributions across Java and Python SDKs. Skilled in designing scalable ETL workflows, data processing systems, and cloud-native architectures using Docker, AWS, and modern data engineering tools.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, ReactJs. **Backend:** Spring Boot, Hibernate, Rest APIs, Postman.

Database: PostgreSQL, MySQL, OracleSQL, MongoDB, Cassandra. **Concepts:** DSA, Agile methodology, Scrum, OOPs.

Programming Language: JavaScript(ES6+), Java, Python, SQL & C++. **OS:** Windows, LINUX, MacOS.

Tools: Git, GitHub, Docker, Kubernetes, AWS, CI/CD, Vercel, Databricks, Spark, Data Lake, Warehouse, ELT, ETL.

EXPERIENCE

CGI | Apprentice | Application support engineer | July 2026 – Present

> Provided **Level 2 production support** for multiple enterprise applications across Linux-based environments, troubleshooting application, server, filesystem, and database-related incidents.

> Supported applications backed by **Oracle Database**, performing SQL-based investigation, database connectivity checks, and analysis of application/database errors.

> Performed **Linux system operations and troubleshooting**, including service/process monitoring, filesystem utilization checks, log analysis, permissions, and application service management.

> Tested and validated application releases/packages received from **Level 3 development teams**, performing functional checks and pre-deployment validation before production deployment.

> Investigated production issues without source-code access by correlating **application logs, Linux system behaviour, database connectivity, configuration, and user-reported symptoms** to isolate probable root causes.

> Supported **filesystem operations and troubleshooting**, including monitoring disk utilization, investigating storage-related application issues, and maintaining application file-system availability.

> Assisted with **vertical scaling/capacity management** by increasing server resources during high-load conditions and validating application performance and availability after scaling.

> Documented recurring incidents, root causes, resolutions, troubleshooting procedures, and operational knowledge to improve **incident resolution efficiency and knowledge reuse**.

PROJECTS

LinkForge | Full Stack URL Management Product | Java, Spring Boot, Spring Security, React.js, MySQL, Tailwind CSS, Kafka, Redis.

> Built a full-stack URL management platform with custom aliases, QR codes, password-protected, and self-destructing links.

> Implemented JWT authentication with HTTP-only cookies and role-based authorization.

> Developed REST APIs for URL shortening, analytics, redirection, and user link management.

> Designed a responsive UI using React and Tailwind CSS

Fraud Detection Pipeline | Personal Data Engineering Project

> Designed and implemented a real-time data pipeline using Apache Kafka and Apache Spark.

> Built a Kafka producer in Python to generate and stream transaction data continuously.

> Configured a Dockerized Spark cluster with Spark Master and Worker nodes for distributed stream processing.

> Integrated Kafka, Zookeeper, and Spark using Docker Compose for local development and testing.

> Implemented Spark Structured Streaming to consume Kafka topics and process transaction records in micro-batches.

> Configured checkpointing and fault-tolerance mechanisms for reliable stream processing.

> Monitored distributed workloads through Spark Master and Worker web interfaces.

> Managed source control using Git feature-branch workflow, pull requests, and environment versioning.

OPEN-SOURCE CONTRIBUTIONS

Google summer of Code – Apache Software Solutions - Apache Beam | 2026 – Present Contributed 6+ merged PRs to Apache Beam across Java and Python SDK modules, improving documentation, SDK examples, readability, and coder inference

EDUCATION

BE – EE, **Dr. Ambedkar institute of technology**, *(Autonomous Institute), Bengaluru* **7.0** *CGPA* **2020-2025**

Class XII **R K Vision PU College**, *PCMB, Chintamani, Karnataka* **87 %** **2019-2020**

Class X **Nandini Vidyanikethana**, *ICSE, Vijayapura, Karnataka* **80 %** **2017-2018**

CERTIFICATIONS

Full Stack Web Development **[HTML, CSS, JavaScript, react.js, Java, DSA, Spring, Springboot, SQL], Coding Ninjas** *(Ongoing).*

Data Engineering **[Python, SQL, Data – Modeling, Warehousing, Snowflake, dbt, PySpark, Databricks, Airflow Kafka] , Data Vidya** *(Ongoing).*

Python Essentials 1 & 2 **(Beginner & Intermediate), Cisco Networking Academy**

AI tools workshop **[ChatGPT, Notion AI, Microsoft Copilot, Gemini, Antigravity, Cursor AI], BE10X**

SOFT SKILLS

Quick learner, Good Communicator, Good team-player, Adaptable, Versatile & Efficient in time management.

LANGAUAGES

English, Kannada *(both read & write)* & Telugu *(Only to speak).*
